## Dynamic Air Quality Solutions Wins ed+c and Sustainable Facility's F

### Dynamic V8 Air Cleaning System Voted as Best Product in Mechanical/HVAC Products Category

PRINCETON, NJ--(Marketwire - Oct 5, 2011) - Dynamic Air Quality Solutions, a leading manufacturer and distributor of high quality products, today announced its selection by readers of Environmental Design + Construction (*ed+c*) ; as one of the best products in 2011. Dynamic's V8 Air Cleaning System was selected as the winner in the Mechanical/HVAC Products Category.

In 2008, *ed+c* and *Sustainable Facility* magazines embarked on an online awards contest that gives manufacturers' products a stack up in the eyes of the magazines' readers, voting for the crème de la crème of green building products with ease of use and installation.

The Dynamic V8's unique technology controls all three types of indoor contaminants: particle, biological and chemical alternatives, the air cleaning system uses two thirds less energy, has a maintenance cycle that is measured in minutes and provides an indoor environment with air cleaner than the air outside. The Dynamic V8 has been installed in corporate Headquarters, and helps earn LEED points in both IEQ (MERV 13) and Energy and Atmosphere (90.1 fan hours per year).

"Now in our fourth year, these awards represent the best of the best in sustainable building products," said a representative from *Sustainable Facility*. "We are pleased with the selections our readers made, and look forward to showcasing Greenbuild this week."

"Selection by the readers of *ed+c* and *Sustainable Facility*, the users of our products, is quite an honor," said a representative from Dynamic. "Our air cleaning system is an excellent tool in terms of reducing the energy and environmental footprint of buildings. Thank you for voting us the winner this year."

Winners will be highlighted in the October issues of each magazine.

### About Dynamic Air Quality Solutions

Dynamic Air Quality Solutions manufactures and distributes high-performance indoor air quality products including germicidal systems, and condensate pan treatments for residential and commercial applications. The company's products range from hospitals and schools to restaurants and casinos.
