

Advantix Systems Honored as Winner of 2011 AHR Expo Innovation Award

December 14, 2010

With its innovative liquid desiccant dehumidification technology, DuCool system named one of AHR Expo's most innovative HVACR products

Miami, Florida – December 14, 2010 – [Advantix Systems](#), makers of dehumidification and cooling systems using liquid desiccant technology, has been named a winner of the 2011 AHR Expo Innovation Award, honoring the most innovative HVACR products showcased at the International Air-Conditioning, Heating and Refrigerating Exposition each year.

From pharmaceutical plants to schools and hospitals, organizations are being held to higher air quality standards, and energy prices continue to increase. With its DuCool DuTreat air conditioning systems, Advantix Systems enables industrial and commercial organizations to optimize their climate solutions while reducing energy costs.

“We are honored to be chosen as a winner of this prestigious award,” said Trevor Wende, Vice President of Advantix Systems. “As a pioneer in harnessing liquid desiccant technology for HVAC applications, we are committed to providing commercial and industrial organizations with a green energy product that effectively controls humidity, delivers cleaner air and boosts their bottom line.”

Winners of the 2011 awards were determined by a panel of judges selected by ASHRAE Journal for its knowledge of the industry and its products. The panel evaluated the submitted products on innovation, application, user value and market impact. One of the ten award winners will also be selected as the winner of the 2011 AHR Expo Product of the Year Award.

Advantix Systems' unit offers superior economics and air quality, reducing operating costs by 30-40 percent compared to conventional vapor-compression outdoor air systems, and by 55-65 percent relative to desiccant wheel systems. Representing a unique and advanced technology in the traditional dehumidification industry, the system enables more precise control of indoor environments by offering independent temperature and humidity control in a single package.

Advantix Systems will be honored at an awards ceremony at the 2011 AHR Expo conference in Las Vegas, Nevada on February 1, 2011.

About AHR EXPO

As the largest and most comprehensive HVACR exposition, the AHR Expo attracts tens of thousands of attendees from all facets of the industry, including contractors, engineers, dealers,

distributors, wholesalers, OEMs, architects, builders, industrial plant operators, facility owners and managers, agents and reps. In addition, more than 100 educational sessions and workshops addressing all facets of the HVACR industry are offered by leading industry associations and organizations during the three days of the Show, many free of charge.

Since 1930, the AHR Expo has been the HVACR professional's best resource for new products, new ideas and new services. It's a hands-on, interactive event that showcases a wide spectrum of equipment, systems, and components. This unique industry forum creates a dynamic marketing environment unequaled in size and scope by any other industry event. The AHR Expo is produced and managed by International Exposition Company, 15 Franklin Street, Westport, CT 06880; telephone: 203-221-9232; fax: 203-221-9260; e-mail: info@ahrexpo.com; website: www.ahrexpo.com.

About Advantix Systems

[Advantix Systems](#)' DuCool air conditioning & dehumidification systems are the most efficient, green, HVAC products available for commercial and industrial applications. Based on revolutionary, liquid desiccant technology, Advantix Systems' products provide 30 - 80% energy cost savings, efficiently control humidity and naturally clean the air of bacteria and mold. As a simple retrofit or an installation powered by renewable energy sources such as solar thermal or waste heat, Advantix Systems means smarter air dehumidification and cooling.
