

We are pleased to announce that CMH Solutions represents:

Annexair is a premiere manufacturing firm that specializes in the design and construction of semi-custom and custom air handling equipment incorporating air-to-air energy recovery technologies. Designs include energy recovery wheels, fixed plates and heat pipes. Annexair provides complete systems with standard heating and cooling options as well as full package systems with refrigeration, heat pumps and stand alone controls. Their products include:

- ERU Series: Air Cooled, Water Cooled & WSHP with Energy Recovery up to 80,000 CFM
- MAU Series: Air Cooled, Water Cooled & WSHP up to 180 Tons
- MAU Series: with optional Energy Recovery
- AHU Series: Chilled Water & DX up to 80,000 CFM

Annexair maintains a comprehensive quality control program that follows every unit through the manufacturing process. Those of you who attended the ASHRAE show had a chance to see the superior quality and attention to detail that Annexair provides.

Others may preach quality - Annexair delivers

We invite you to take a virtual tour at: <http://www.annexair.com/Factory.html>

We at CMH believe that Annexair is the quality solution that can meet and exceed the needs of the South Florida market.

All of us at CMH Solutions look forward to serving you.
